Shift note

Second half of the shift only - picked SD50B-2026-10416 up after the changeover.

Observations

- Vacuum sounded higher pitched than normal towards the end of the run.
- Squeegee leaving a thin streak on the left side. Not bad enough to stop but worth a look.
- E-017 came up twice (Squeegee lift fault) and cleared on its own both times.

Actions taken

- Swapped the squeegee blade over to the spare set from the cabinet.
- Wiped the squeegee blades down and checked the deflection.

Outstanding

- Please confirm the wear limit before changing anything, I am going from memory.
- Service desk has not come back yet, do not take it on the polished floor until they do.

Signed off, S. Petrov. Any questions the number is on the board.
