Shift note

Depot North, early shift. Hour meter on SDR90-2026-10279 read 4130 h at start.

Observations

- Charger took longer than usual to finish, no error shown though.
- Left hand side broom seems to be missing bristles.
- Battery dropped faster than usual, down to about a quarter by hour four.

Actions taken

- Reset the fault from the display and carried on, ran fine after that.
- Left it on charge and tagged it so nobody takes it out before it is looked at.

Outstanding

- Please confirm the wear limit before changing anything, I am going from memory.
- Battery wants a full charge cycle, do not take it out on a short top-up.

Handed over to the incoming operator. D. Mensah
