

Hangar Seven - 2026-06-29

Document handover-hangar-seven-2026-06-29-35 · revision 1 · effective 2026-06-29

Machine types: SWR-120

Item numbers: 1.721-105.0

Serial numbers: SWR120-2026-10280

Site: hangar-seven

Shift note

Day shift handover. SWR-120 performing normally apart from the note below.

Observations

- Noticed a rattle from the deck when reversing. Goes away at low speed.
- Recovery tank smelled bad at the end of the run, probably not rinsed properly yesterday.
- Water on the floor behind the machine in the last hour, squeegee not picking up cleanly.

Actions taken

- Wiped the squeegee blades down and checked the deflection.
- Topped up the solution tank and checked the detergent dosing was set right.

Outstanding

- Wants a filter check before the next long run.
- Left the fault log on screen for the engineer, please do not clear it.

Signed off, A. Okafor. Any questions the number is on the board.
